Brief Summary

Aspiring Software Engineer with a strong foundation in Data Structures, Algorithms, and Object-Oriented Programming, backed by hands-on experience in Java, MERN, and Spring Boot. Built a full-stack application with a focus on RESTful APIs, database design, and deployment. Skilled in version control (Git/GitHub) and familiar with Agile development practices. Solved 100+ LeetCode problems, demonstrating solid problem-solving and analytical thinking. Enthusiastic about scalable software design and continuous learning.

Education

R N S Institute of Technology, Bangalore,

2022 - 2026

BE in Computer Science and Engineering

- CGPA: 9.19

Experience

Webknot Technologies, Software Developer (7 LPA)

Nov 2025 – Present

- Worked on building and improving RESTful APIs using Spring Boot, JPA/Hibernate, and SQL databases. Assisted in developing scalable backend modules, fixing bugs, writing clean code, and collaborating with the team through Git, code reviews, and debugging.

Projects

Shortify: Personalized URL Management System

- Built a full-stack web application with user authentication and URL shortening features.
- Enabled users to set custom expiry dates for shortened URLs, enhancing control and security.
- Implemented a user dashboard to view and manage links with real-time click tracking.
- Key Skills: MongoDB, Express.js, React.js, Node.js
- **Link:** <https://github.com/srushti-ms/shortify-Url-shortner>

Simple Retail Management System (Backend Only)

- Built a backend application to manage retail store operations such as products and users.
- Designed REST APIs using Spring Boot and handled data with MongoDB, along with Spring Security, JWT for the authentication.
- Key Skills: Spring Boot, Spring MVC, Maven, Lombok, Postman, Spring Security.
- **Link:** <https://github.com/srushti-ms/Retial-Management>

Generative Storytelling and Comic Creator

- Developed a chatbot that generates short stories and comic-style images from user prompts.
- Integrated NLP for storytelling and AI image APIs for visual generation via Streamlit.
- Key Skills: Python, GenAI, Git, Github, Langchain, Streamlit
- **Link:** https://github.com/srushti-ms/image_generator

Achievements and Awards

- Secured 2nd Place in National-Level Ideathon organized by The Institution of Engineers (India), Karnataka State Centre.
- Top 6 finalists at the Girl Geeks 2024 Hackathon, organized by the IEEE Computer Society Bangalore Chapter in September 2024.
- Won 1st place at Open House Panorama, held at RNSIT for the project "Piracy Detection using Video Steganography".

Certifications

- Microsoft Certified: Azure Fundamentals (AZ-900)
- Programming using Java
- Google Cloud Career Launchpad – Cloud Engineer Track

Skills and Interests

- **Programming:** Java, C++ , Python.
- **Web Technologies:** NodeJS, ExpressJS, MongoDB, Spring Boot, MySQL, Docker
- **Tools:** Git, GitHub, Postman, VS Code.
- **Core Areas:** Data Structures & Algorithms, Object-Oriented Design, REST APIs, Cloud Fundamentals, Devops.
- **Soft Skills:** Problem-Solving, Decision Making, Team Collaboration.
- **interests:** Bike Riding, Guitar, Music.
